About Bri-Tech

Bri-Tech is a leading designer and integrator of high-end commercial automation systems including fire alarm, intrusion, access control, data networking, voice communications, and IP video surveillance. For over 20 years, businesses have relied on our experienced team of engineers to design and manage their security, communication, and automation systems.

Through investment in training, technology, and recognizing the customer's need to reduce costs, Bri-Tech has developed their own Simple Energy Management System (SEMS). This system includes a lighting control system that seamlessly integrates with a company's alarm system. Companies can reduce their energy costs by automating their electrical system.

We deliver top quality products and services to our valued customers. Our goal is to develop life safety systems that protect your assets today, so they are there for you tomorrow. Our professional and dedicated team is ready to meet your security, communication, and electrical needs.

Very truly yours,

Brian McAuliff
President

Why Bri-Tech?

Engineering

A well-designed system will provide years of reliability and safety. Bri-Tech's senior designers have over twenty years of experience and have developed standards and methods that can be applied to every job. Projects are developed on our CAD system and full size drawings are prepared for the installation staff and documented for future service and upgrades of your system. This advanced planning is important to getting the most out of your investment.

Integrated Systems

Companies can save money by integrating their security and electrical systems. Bri-Tech is the cost effective solution for all automation needs. There are many benefits to choosing one integrated vendor, rather than many for each seperate system. Along with the convienience of making only one service call and having total control of all systems, there is also instant monitoring through our Web Connect web site.

Experience

New York tri-state area businesses and institutions have relied on the proven experience and expertise of Bri-Tech for their technology installations for over twenty years. From multimedia conference rooms to fully-integrated security, life safety, access control, and monitoring systems (Web Connect), Bri-Tech is your single source for design, installation, and service.

"I have worked with Bri-Tech for over 19 years and consider them to be an invaluable resource. Their extensive knowledge of electronics systems, low voltage and line voltage electrical systems and their ability to integrate these technologies seamlessly, coupled with their design and aesthetic sensitivity, makes them a unique provider that I have relied upon over the years. They simplify the complex world of technology that enables us, the design professional to satisfy our clients needs and expectations."

Trained & Certified

Our staff has received extensive training on the systems
we install and service. We have trained and certified technicians,
programmers, engineers/designers and tech support specialists responsible
for maintaining our monitoring systems. To improve our customers' security systems,
Bri-Tech's staff receives continued education on the latest technologies.

Direct Dealers

We are direct dealers for many of the best security manufacturers in the business. Our valued partners
continue to ensure that we receive the latest products, training, and full warranty support.

SINGLE SOURCE SOLUTIONS

You can rely on Bri-Tech as your single source solution. All of our systems communicate seamlessly together bringing you top level control and real time monitoring. Whether you own multiple buildings or one office complex, you only need to make one phone call to service any system. Bri-Tech will keep you connected to all your buildings and systems with our integrated automation solutions.

"The decision to use Bri-Tech is one near the top of my list in terms of return on our investment. Bri-Tech specified and designed all the low-voltage systems for our facilities — computer network, fire alarm, intrusion alarm, video surveillance, public address system, video and keyless access.

You will find that Brian and his staff are very knowledgeable and very thorough. They bring great expertise and experience to the table. I cannot recommend them more wholeheartedly."

KEEPING YOU CONNECTED TO

Web Connect

What is Web Connect?

Since time management is important to most businesses, it is imperative that owners have access to monitor their office buildings with a simple mouse click. Bri-Tech's Web Connect is a web site that allows business owners the flexibility of monitoring and controlling their office building from anywhere in the world. Simply log on to Bri-Tech's secure web site and go to a user friendly interface where you can view and control your buildings security, lighting, fire alarms, and room temperatures. Bri-Tech can keep you connected to what matters in your life, people and resources.

E-Mail Notifications

Bri-Tech's Web Connect continually connects to your office and monitors for emergency conditions such as unauthorized entry, fire, water leaks, and low temperature. In the event of an emergency, an e-mail notification will be sent directly to you.

YOUR ASSETS WITH WEB CONNECT

Integrated Systems
From Your Desk

Bri-Tech builds customized support monitoring systems that utilize off-network monitoring. Our advanced network monitoring systems enable businesses peace of mind even when their own networks are down. Notifications are sent from an outside network, alerting business owners to the status of the building's systems. Take control of your building's temperature, ventilation, access control, fire detection, security/alarm systems, video monitoring, lighting, and public address systems - all from the convenience of your desk. With Bri-Tech's *Building Life Support* systems, you may control many buildings in dispersed locations with one user interface, and continue monitoring even when your network is down.

Intrusion

Protect Your Assets Today... So They Are There For You Tomorrow!

Bri-Tech's customized security systems give business owners peace of mind with technology solutions that protect company assets and reduce security costs. Whether a company is looking to monitor employee productivity or reduce theft, our systems offer business owners the flexibility to monitor and control their office from anywhere in the world. With state-of-the-art security systems, Bri-Tech is ready to protect your company, employees and clients 24 hours a day, 7 days a week.

Access Control and Gates

Access Control goes beyond traditional card readers and cards. Our system gives companies total control over who is permitted to access their facilities by integrating access control technology with gate control systems. We can develop customized levels of protection that can permit, limit or deny access to any area of a building.

Data Networking

One of the most vital requirements of any business is the rapid and reliable transfer of data. Structured cabling with category 5e, 6, 6e and fiber allows the linkage of stations of a local area network (LAN), while maintaining a high degree of flexibility. Bri-Tech's structured cabling network ensures quality transfers of data with superior accuracy and speed. Companies can benefit by having communication networks ready for any future applications.

Some benefits include:

- Easy administration and troubleshooting

- Reduced cost of moves and changes

- AutoCAD as built drawings

Digital Video Surveillance

Bri-Tech offers video surveillance solutions that allow any camera, live or archived, to be monitored across the network. Whether you need to track people and assets at multiple buildings or a single location, you can count on Bri-Tech's digital camera systems to increase your security and reduce theft.
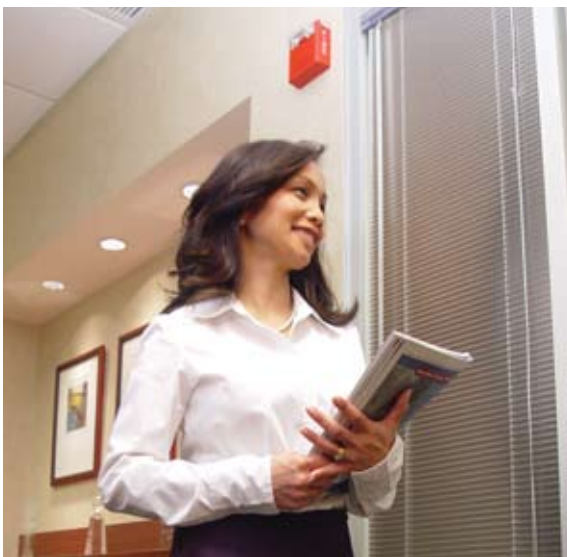

Fire Alarm

Bri-Tech offers life safety systems that are a necessity for businesses to protect their employees and property. Our fire alarm systems guarantee you the best protection by exceeding the latest safety standards. We have installed our life safety systems in New York tri-state area corporations, schools, health care facilities, and residences. Our unique detectors can adjust their sensitivity for dust and dirt accumulation and send out alerts when it's time for cleaning. They can also pinpoint the exact location of trouble spots as each device has an ID chip.

Systems include:

- Sprinkler System Monitoring
- Detection and Alarm Monitoring
- Audible Evacuation Systems
- Design/Installation/24-Hour Service
- NFPA 72 & ADA Compliance Assistance

Conference Rooms and Power Offices

Bri-Tech designs and installs conference rooms, theaters, and board rooms for professional presentations and meetings. Businesses can get the power of presentation where most potential customers are sold before the presentation takes place. The state-of-the-art conference room that Bri-Tech delivers makes customers want to do business as soon as they take their seats.

Our conference rooms think for themselves, leaving more time for executives to focus on their professional presentations. From lighting controls to shade and acoustic controls, be on top of your game at your next board meeting.

Bri-Tech offers:
- Lighting & Shade Controls
- Acoustics
- Audio/Video
- Teleconferencing
- Network/Internet Connections

Communications and Audio / Video

Your public announcement system can be your most important life safety system in an emergency situation. Bri-Tech can design and provide audio communication systems that range from a single station intercom to more complex systems including:

- VoIP Phone Systems
- PA and Intercom Systems
- Entry Systems
- Sound Reinforcement

Our communication systems can be integrated with a range of external equipment such as access control and CCTV systems.

Design & Engineering

Corporations have relied on the proven experience, and expertise of Bri-Tech's professional design team for their corporate technology designs and installations. Bri-Tech is the leader in engineering integrated systems that are cost effective and reliable. By using CAD drawings and 3D models, Bri-Tech can fit all the right pieces together and deliver high quality engineered systems that meet the changing needs of businesses today.

System designs include:

- IP Video Surveillance, Access Control, & Gate Control Systems

- Fire Alarm and Intrusion

- Multimedia Conference Rooms and Conference Centers

- Network Infrastructure

Need to reduce   your energy costs?

Simple Energy Management System (SEMS)

Need to reduce your energy costs? Bri-Tech's proprietary Simple Energy Management System (SEMS) is a solution, incorporating lighting and HVAC control that seamlessly integrates with your alarm system. The SEMS system is a cost effective solution that leverages your security system to save on energy costs.

Clients

Bri-Tech's clients range from college campuses to commercial office buildings, hospitals, and corporations. We strive to exceed our customers' expectations on every project and develop designs that meet their safety needs. Call us for a current list of references.

Our systems are scalable from a simple alarm to a fully integrated data center.
