

Construction Cameras

HD Time Lapse Camera by EarthCam

See your project evolve with a High Definition photo taken every 15 minutes. Images are viewable online and these shots are then compiled into a Blu-ray movie for use in marketing and promotion. The system permits recording of weather conditions and other field data. The High-Def image is zoomable so you can see unbelievable detail. Available in wireless or wired versions. All recording is stored off-site to ensure images are always retrievable.

Features:

- Optional Wireless Connectivity
- Rugged and Weatherproof
- Remote Monitored
- Dozens of Lens Options
- Web Viewable

Netray

Netray Economy Construction IP Camera

This self-contained camera captures and stores 3 days of video which you can view using a broadband connection. Check on arrival of manpower, deliveries and for general security assurance. A remote power supply with integral battery back-up insures consistent operations. View at any time with a Bri-Tech Web Connect account. Options for additional cameras and extended recording times are available.
