Structured Distribution Center for Internet, Network and Cable/Satellite TV

The benchmark in organized cabling provides the platform for the most reliable home and business networks and entertainment systems. The Ready Center contains power conditioning and battery backup for routers and switches to insure power issues do not cause performance issues. Available with high quality distribution amplifiers to insure cable feeds to TV's set boxes for delivery of 4K content. By building in a POE switch the Ready Center can support up to 24 WI-FI access points or hardwired network jacks. Configurations are available for security and camera systems. Additional Ready Centers can be added to scale to any size and can be connected interconnect with fiber cable with optional fiber kit.
