

Network Cabling

Bri-Tech's goal has always been to meet the needs of customers who require specialized cabling for their telephone and computer systems. Our experienced technicians have been trained and certified in installing engineered networks.

Our staff is completely trained to insure compliance to the EIA/TIA standards necessary for high-speed data transmission. These standards not only apply to the cable, but also details installation methods, jacks, patch panels, etc. If there is ever a problem, Bri-Tech tests everything 100% and provides performance reports. Thrown cables can be fully supported on trays and are held with cable ties for optimum performance.

Bri-Tech has installed fiber backbone cabling systems for many of Long Island's leading corporations, including: ADP, Underwriters Labs, Periphonics, Nature's Bounty, Computer Associates.

Corporate Systems Network Cabling

We provide a great approach to communication solutions and a reliable voice, data and video infrastructure support service. We continue to provide our great design, installation and diagnostic services to everyone.

- Structured Wiring Plant Design (CAD, IDF)
- Data Center Layouts
- Switched Network Upgrades
- Single and Multi Fiber Installation

Bri-Tech applies the same exacting standards of design, installation and diagnostic services to each of our corporate customers, large or small. We are committed to providing the most creative and professional solutions to communications problems, and offer a reliable infrastructure of voice, data and video support.
