Design and Planning

Theme Switching

CAD & 3D Design

Ambiance and atmospheric lighting are under your control. Automatic schedules give a sophisticated "museum look" as well as save energy. Replace unsightly gangs of switches with elegant keypads that complement your interior. The keypads are theme controls which light rooms to perfect mood levels and illuminate the pathways to your destination. In addition, lights can work automatically in response to a door opening or motion detection. When you leave or arm your Symbiant security system, all lights can be turned off with one touch. All our systems can be customized to fit your lifestyle and are scaleable from cottages to estates.

Elegant lighting can make...

- ✓ A single room brilliant!
- ✓ A pathway illuminated!
- ✓ An entire home shine!
- ✓ All with simple controls that have the fit and finish of a fine watch.

When trying to achieve the perfect balance of light in your home you must also consider natural light. Lutron's Shading Solutions allows you to easily and elegantly control the amount of sunlight you let into your room. With a simple touch of a button you can raise and lower shades allowing you to easily enjoy the full benefits of all your windows every day.

Shading solutions can...

- ✓ Give you and your family increased privacy
- ✓ Protect expensive furniture from harmful U/V rays
- ✓ Provide elegant and convenient control of natural light with a single push of a button.

Keypad Styles

4 Series

The most economic system, the 4 Series offers controls that use designer opening wallplates. Offering a clean yet elegant look by combining the functionality of many standard switches into one single control. The 4 Series can work as a stand alone system or can be integrated with the HomeWorks Wireless Series at any time.

8 Series

As the premier HomeWorks offering, the 8 Series offers the widest selection of control styles and finishings to enhance your luxury home. The 8 Series can work as a stand alone system or can be integrated with the HomeWorks Wireless Series at any time.

Wireless Series

Utilizing HomeServe radio frequency technology, the Wireless series does not require any additional wiring to install, making it ideal for existing homes or expanding a system. The wireless series is compatible with both the HomeWorks 4 Series and 8 Series systems.

Shading Solutions

Lutron custom-manufactures every shade from simple manual roller and Roman shades to sophisticated systems using Sivoia Quiet Electronic Drive technology. Select from a variety of fabrics with different looks, colors and functions including light-filtering, privacy, or blackout. Shading Solutions allow rooms to become multifunctional, with blackout shades your living room can transform into a home theater!
