Manage and catalog your precious wine collection with Crestron control systems and eSommelier. At the touch of a button you can search your entire inventory and retrieve pertinent information about the wine you're looking for.

Wines can be sorted by country of origin, region, variety of wine, winery, vintage, or ripeness. The extensive library of wines (over 139,000 included in the pre-loaded Wine Spectator database) can be viewed in its entirety, or the user can elect to view only the available wines in his or her particular collection, or those that have been flagged to be re-ordered. You can even find a wine's precise location in the wine cellar!
