

BRI-TECH INTRODUCES... THE SYMBIANT QUIET DOOR DRIVE.

Introducing...

quiet
door

symbiant quiet door drive

Motorized pocket doors are elegant, space-saving additions to any home. The experts at Bri-Tech are proud to introduce their new line of safe, quiet, and motion activated doors:

The Symbiant Quiet Door Drive.

► Safe:

The Quiet Door Drive quickly detects if anything enters the path of the closing door and will auto-reverse direction.

► Quiet:

Not a single gear or motor is used in the Quiet Door Drive. Driven by magnets, the door barely makes a sound.

► Automated:

The Quiet Door Drive can be operated by motion, switching, or through integration with Symbiant Home Automation.

Quiet Door Drive Features & Specifications:

Features:

- Near silent operation.
- No gears, motors, or linkages.
- Functions like a standard door during power outage.
- Ideal for disabled persons.
- Safe for children and pets.
- Openings up to 44 inches.
- Automatic reversal if obstacle is detected.
- Decelerates when closing to avoid noise and for added safety.

Specifications:

Control Options:

- Motion Detection.
- Photo-beam.
- Keypad.

Requirements:

- 110VAC 5A.
- Symbiant Core and wiring to track.
