

## Motorized Pocket Door

*Motorized pocket doors are elegant, space-saving additions to any home. The experts at Bri-Tech are proud to introduce their new line of safe, quiet, and motion activated doors*

**Safe:**

The Quiet Door Drive quickly detects if anything enters the path of the closing door and will auto-reverse direction.

**Quiet:**

Not a single gear or motor is used in the Quiet Door Drive. Driven by magnets, the door barely makes a sound.

**Automated:**

The Quiet Door Drive can be operated by motion, switching, or through integration with Symbiant Home Automation.

1

**Open/Close Button:**

Simply push the button manually to open/close the door.

2

**I-Spy 4:**

The world's smallest detector offering inconspicuous curtain protection for corridors, passageways, doors and windows as well as support for access control, CCTV and various other control applications.
